CODEASTRA 2.0

BEYOND THE CODE

RULEBOOK

01. EVENT OVERVIEW & PARTICIPATION

Overview:

CODEASTRA 2.0 is an offline 24-hour hackathon focused on innovation, technical execution, collaboration and adaptability across AI & ML, Web & Product Development, Cybersecurity & Blockchain, and Cloud Computing and Distributed Systems.

Team Formation:

Teams consist of 3–4 registered participants. Each team nominates one Team Leader. All members must actively contribute. Every participant belongs to only one team.

Selection Round:

Teams submit a presentation covering Problem Statement, Solution, Technology/Tech Stack, Innovation/USP, and Feasibility. Selection focus:
Problem → Solution → Innovation → Feasibility → Impact

02. THE 24-HOUR BUILD

Schedule:
Start 10:30 AM • End 10:30 AM next day

Development Rules:
Work during official hackathon hours. Use permitted open-source libraries, frameworks, APIs, datasets and tools. Internet access and documentation allowed. Pre-built projects prohibited. Major pre-existing code/AI components must be disclosed. Teams responsible for copyright and IP compliance.

AI Tools:
ChatGPT, GitHub Copilot, Gemini, Claude, Cursor permitted unless prohibited. Teams must understand and explain AI-generated code. AI work must not be falsely represented as entirely human-written. AI tools cannot be used to copy other teams or gain unfair advantage.

Equipment:
Bring your own laptop and required devices. Organizers not responsible for data loss or device failure.

03. MENTORING CHECKPOINTS & CONVERGENCE

Hour 5 – Mentoring Round 1:
Feedback on problem understanding, solution approach, technical direction, and progress. Guidance only; not elimination-based.

Hour 6 – Convergence Round:
Teams paired across domains to integrate solutions. Teams identify a complementary component (API, AI model, smart contract, security layer, cloud service, database, etc.) and create functional technical integration. Integration must be real, not cosmetic. Prize: 12,000 total (6,000 per winning team).

Hour 10 – Mentoring Round 2:
Review of working prototype, technical implementation, and problem-solution alignment. Collaboration Rules: Mentors may guide but cannot develop projects. Unauthorized inter-team assistance prohibited. Professional communication expected.

04. TRIAL & REWARD (HOUR 12)

Each domain receives a surprise challenge designed to test adaptation.

AI & ML:
Dataset/model change or new performance requirement.

Web & Product Development:
Feature request or UX change.

Cybersecurity & Blockchain:
Vulnerability or authentication requirement.

Cloud Computing and Distributed Systems:
Scaling, deployment or cost constraint.

Teams modify existing solutions within ~2 hours. Do not replace with unrelated work. Top-performing team per domain receives strategic reward. Failure to complete does not auto-disqualify.

05. FINAL SUBMISSION & JUDGING

Final Submission:

Project, source code/repository, problem statement, key features, technology stack, setup instructions. No major changes after deadline.

Presentation Format:

- 5 min presentation
- 3-5 min live demo
- 2 min Q&A (Total: ~10-12 min)

Evaluation Criteria (100 marks):

- Working Prototype & Functionality (25)
- Problem-Solution Alignment (15)
- Technical Implementation (15)
- Innovation/USP (15)
- Features & UX (10)
- Impact & Scalability (10)
- Presentation & Demo (10)

06. INTELLECTUAL PROPERTY & CONDUCT

IP Rules:

Plagiarism prohibited. Submitting existing work as original prohibited. Acknowledge third-party code, APIs, datasets and libraries. Teams retain ownership of original work. Organizers may showcase submissions for promotion and educational purposes with attribution.

Code of Conduct:

Professional and respectful behavior mandatory. Follow organizer/mentor/judge/volunteer instructions. Harassment, discrimination, bullying, cheating and disruptive behavior prohibited. Serious misconduct results in disqualification.

Disqualification Grounds:

- Plagiarism
- Copying another team's work
- Pre-built project submission
- Cheating/unfair collaboration
- Accessing/interfering with other team projects
- IP/licensing violations
- Misuse of AI or third-party resources
- Late submission
- Serious misconduct
- False information
- Manipulating judging

07. EVENT FLOW & PARTICIPANT PRINCIPLES

Timeline:

Selection → Hackathon Start → Hour 5 Mentoring → Hour 6 Convergence → Hour 10 Mentoring → Hour 12 Trial & Reward → Continued Development → Final Submission → Final Judging → Results

Key Principles:

- BUILD during official hours
- COLLABORATE with teams
- LEARN from feedback
- ADAPT to challenges
- INNOVATE meaningfully
- SUBMIT on time
- DEMONSTRATE your work
- COMPETE FAIRLY

Organizer's Rights:

Organizers may modify schedule, rules, or challenges with official communication. Judging decisions are final.
