

A person stands at the end of a long, glowing blue tunnel that curves into the distance. The tunnel is illuminated by a bright light at its exit, creating a strong sense of perspective. The background is a deep black space filled with stars and nebulae, suggesting a cosmic or futuristic theme.

ABOUT DEPARTMENT

The main focus of the department is to produce graduates with strong fundamentals in Information Technology domain. There is a distinct entrepreneurial spirit in the students of the department. The department has well equipped classrooms and computer laboratories with high – end systems. Moreover, it has a rich departmental library. The department also has a Student Body named ABIT

VISION

To create competent technical professionals in Information Technology with ethical behaviour and environment conscious

MISSION

- To provide an ambience which nurtures research ideas in futuristic domains of Information Technology.
- To direct faculties in research and consultancy / advisory roles.
- To provide contemporary and cutting-edge technical education in Information Technology

GO BEYOND

ABOUT ABIT

- Association of Budding Information Technocrats (ABIT) nurtures a vibrant community of tech enthusiasts and aspiring professionals.
- Our mission is to connect theoretical knowledge with practical application through various initiatives.
- By participating in events like CODEASTRA, you gain invaluable experience and skills that will set you apart in the tech landscape.

ABOUT THEME

“There is always a line.”

A line between what you know and what you don't. Between an idea and reality. Between trying and achieving. Between who you are and who you could become.

This year, “**GO BEYOND**” represents the courage to cross that line to move beyond the familiar, challenge expectations, and discover new possibilities. It is a celebration of curiosity, innovation, ambition, and the pursuit of what lies beyond the boundaries we know.

Because every breakthrough begins when someone dares to cross the line.

And when you do, you discover what's BEYOND.

WELCOME TO CODEASTRA 2.0

CodeAstra 2.0 is a 24-hour offline hackathon under Synergy 2027, bringing together students and young developers to build innovative, real-world technology solutions.

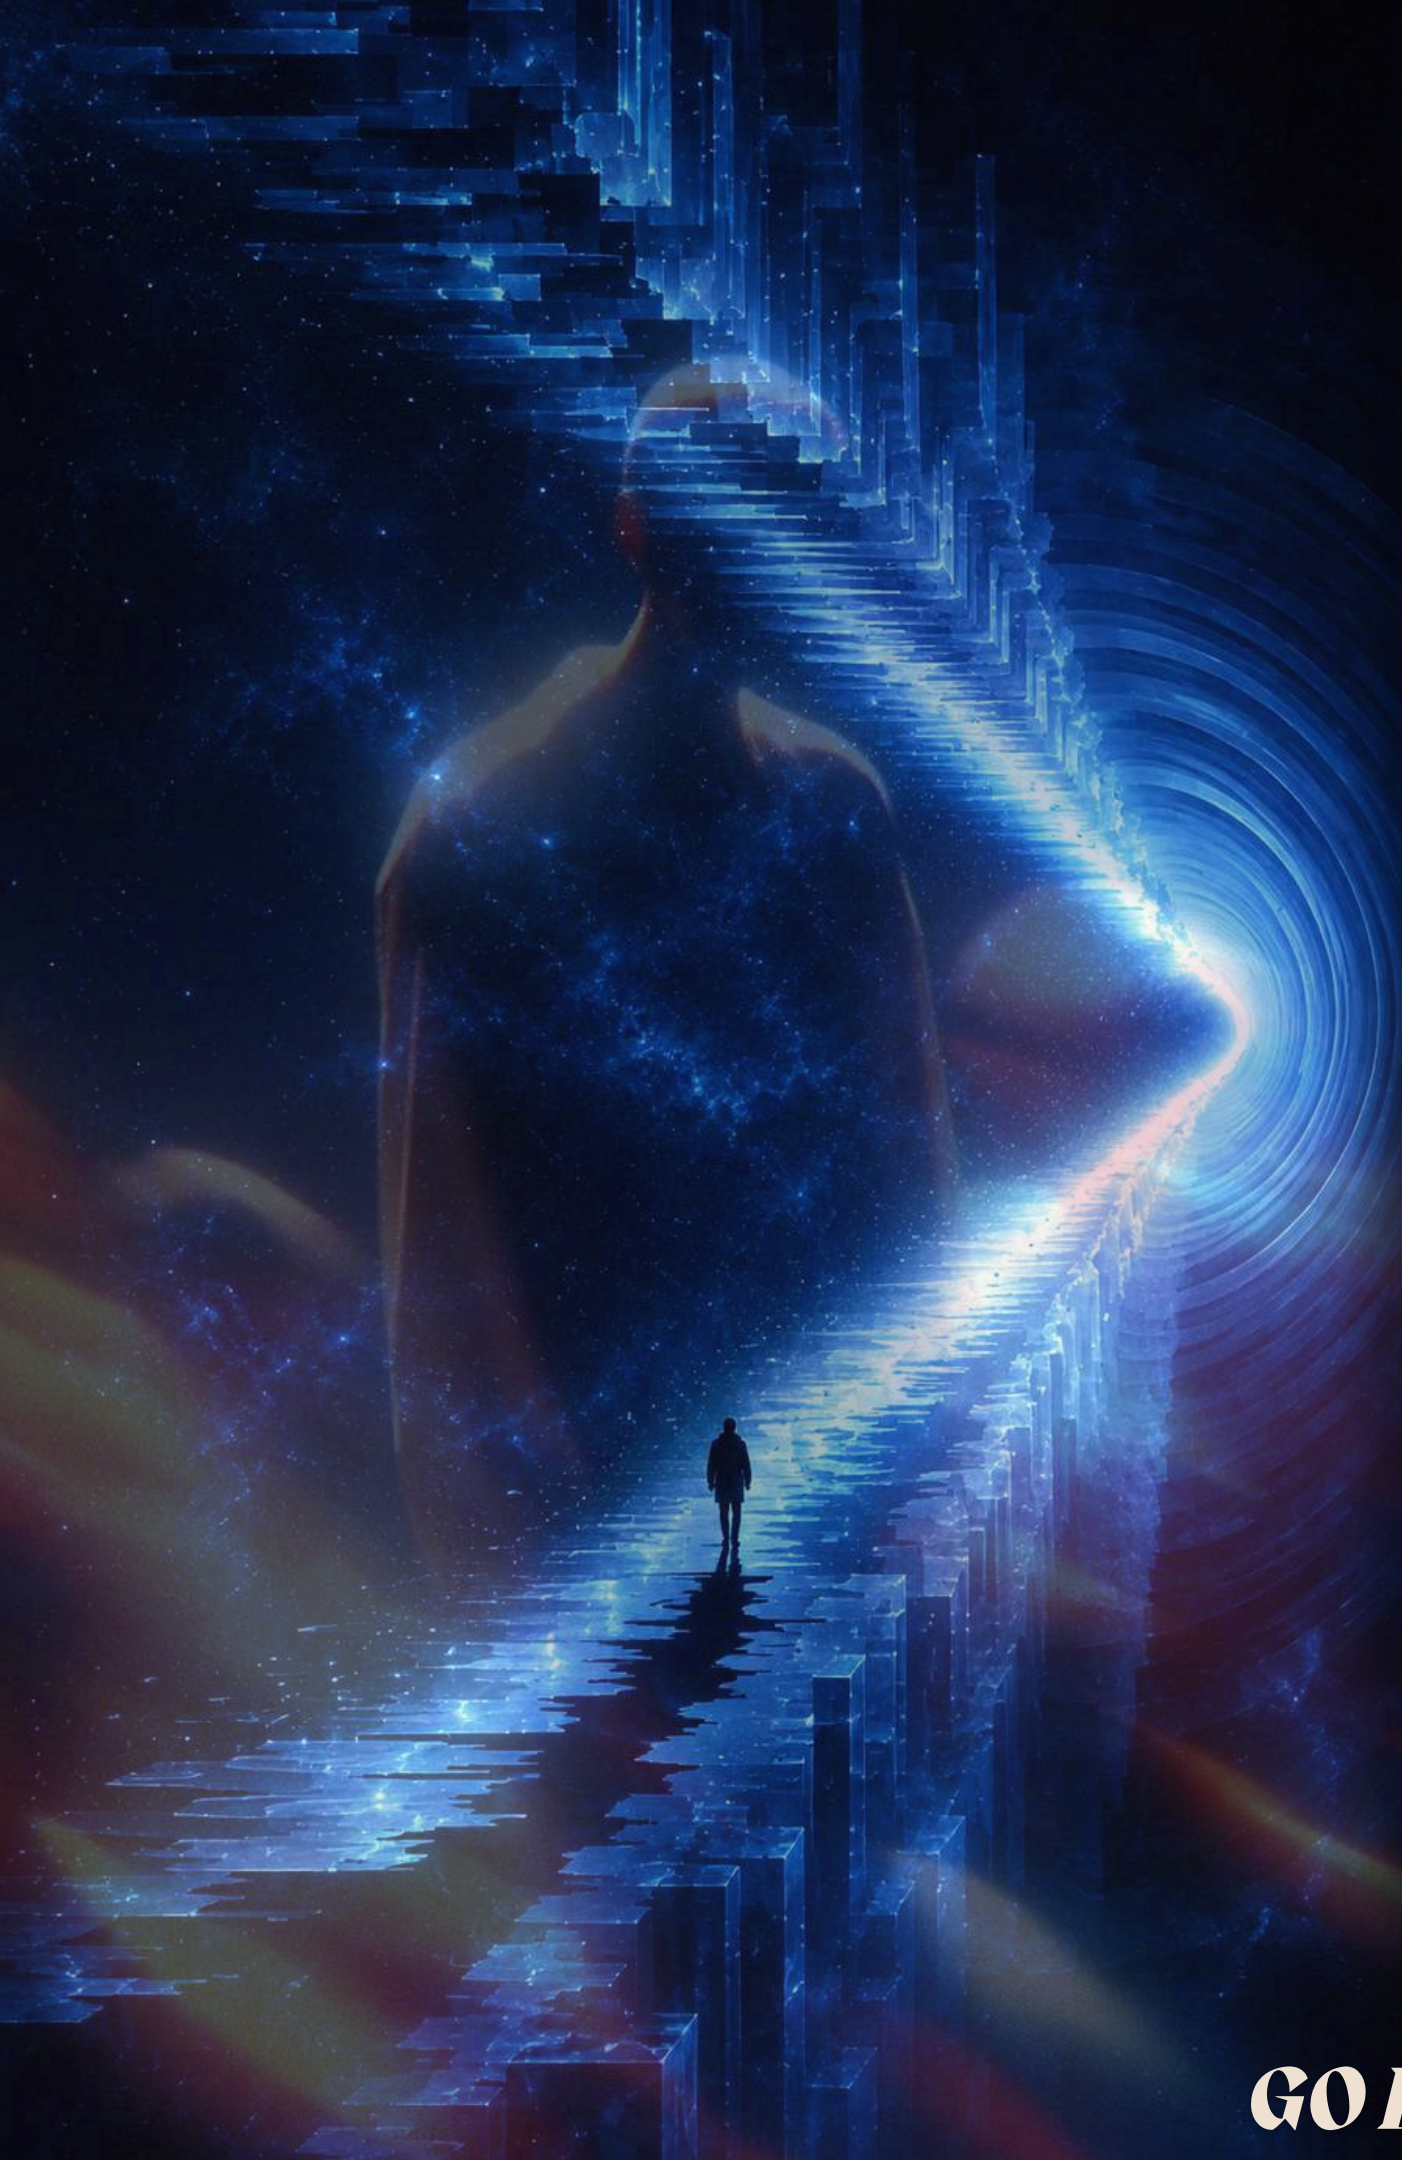

Unlike a traditional hackathon, CodeAstra goes beyond the code, challenging participants not only to build, but also to adapt, collaborate and solve under pressure.

Across AI & Machine Learning, Web Development, IoT, and Cybersecurity, participants will turn ideas into working solutions while navigating mentorship, unexpected challenges, and opportunities to collaborate beyond their own domain.

With Trial & Reward, Convergence, and a final showcase, CodeAstra is designed to test more than technical ability; it tests how teams think, respond, integrate, and create when the conditions change.

GO BEYOND

DOMAINS

WEB & PRODUCT DEVELOPMENT

Build modern digital experiences, scalable products, and innovative web solutions.

CYBERSECURITY & BLOCKCHAIN

Secure the digital world through cyber defense, decentralized systems, and trusted technology.

CLOUD COMPUTING & DISTRIBUTED SYSTEM

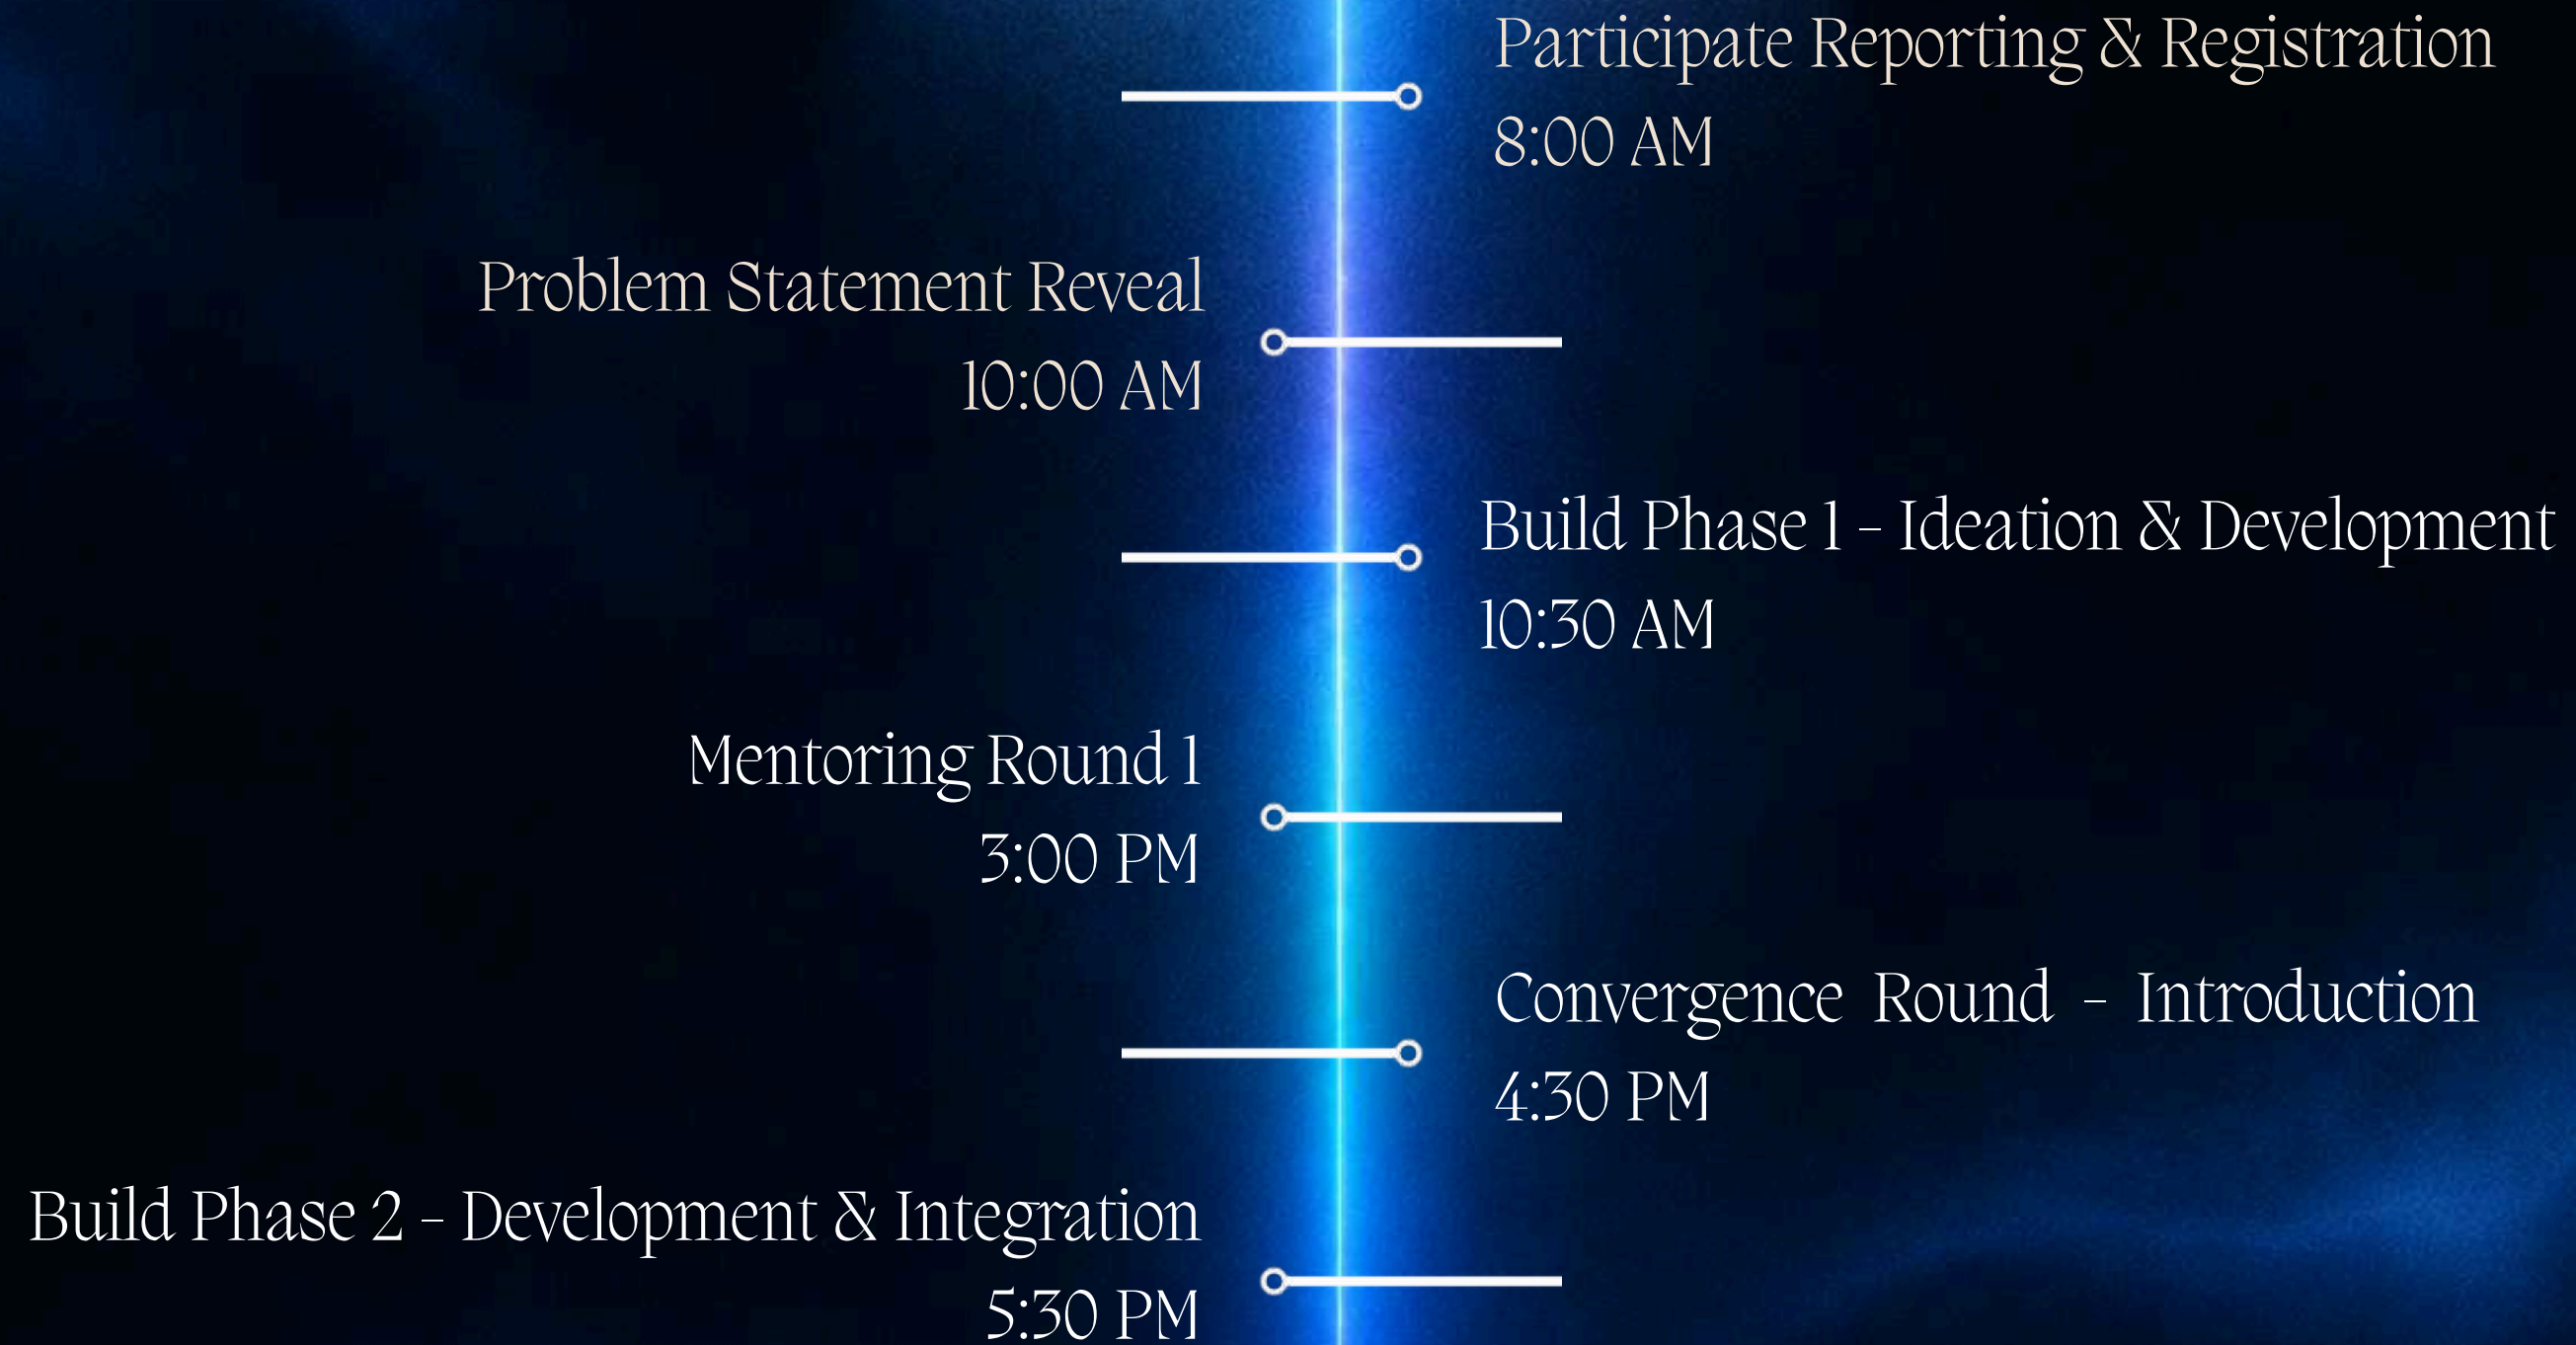

Design scalable, connected solutions powered by modern cloud infrastructure and services.

AI & ML

Transform data into intelligent solutions using artificial intelligence and machine learning.

TIMELINE

Mentoring Round 2
8:30 PM

Trail & Reward Round
10:30 PM

Build Phase 3- Development & Testing
11:30 PM

Build Phase 4- Final Development , Testing & Refinement
3:00 AM

Final Submission and Demo Setup
9:30 AM

Final Judging - Live Demo & Jury Q&A
10:30 AM

Final Results and Closing Cerem
9:30 AM

TRIAL & REWARD

During the 24-hour hackathon, teams will face a domain specific challenge designed to test their ability to adapt, think under pressure and strengthen their solution.

4 Domains → 4 Trials → 4 Rewards

The exact nature of the trial and reward will be revealed during the hackathon.

THE TRIAL

A challenge is introduced during the build phase, requiring teams to adapt their existing solution within a limited timeframe.

THE REWARD

The best-performing team in each domain earns a strategic advantage that can give them an edge in the final stage of the hackathon.

GO BEYOND

CONVERGENCE

Two Teams. Two Solutions. One Integrated Outcome.

Teams are paired with another team, preferably from a different domain, to collaborate and integrate a meaningful component of each other's solution into their own system.

THE CHALLENGE

Both teams must successfully incorporate the other's component and demonstrate how the collaboration strengthens their solutions. Evaluated on quality of integration, technical execution, innovation and value created through collaboration.

₹12,000 CONVERGENCE PRIZE

₹6,000 per winning team

GUIDELINES

01. RESPECT & CONDUCT

Maintain professional and respectful behaviour towards all participants, mentors, judges and organizers.

02. BUILD DURING THE HACKATHON

Major development work must be completed within the official 24-hour hackathon period.

03. ORIGINALITY

No plagiarism or pre-built projects. Clearly acknowledge third-party resources, APIs, datasets and AI-generated components.

04. FAIR PLAY

Do not copy, access or interfere with another team's work. Unfair practices may lead to disqualification.

05. FOLLOW THE FLOW

Participate in all required rounds, mentoring checkpoints, challenges and final submission/demo sessions.

06. RESPECT THE VENUE & DEADLINES

Keep the venue clean, follow safety instructions and submit your project before the announced deadline.

FINAL NOTE

Follow official announcements and instructions from the CODEASTRA 2.0 organizing committee throughout the event.
